Projects

Personal Portfolio

Nov 2024

- **Tools Used** : HTML, CSS, JavaScript
- This project showcases my personal portfolio website, designed and developed to highlight my skills, experience, and projects. It features a responsive design, smooth navigation, and visually appealing UI, created using HTML, CSS, and JavaScript. The goal of this project was to create an engaging platform to present myself to potential employers and collaborators.

Smart Buy

Aug 2024

- **Tools Used** : HTML, CSS, JavaScript
- Smart Buy is a user-friendly e-commerce website built to provide seamless navigation and shopping experiences. It features an intuitive UI, interactive sections like a cart page, and well-structured landing pages. Developed using HTML, CSS, JavaScript. This project focuses on creating an efficient platform for presenting products and enhancing user interaction.

Make Your Resume

Nov 2024

- **Tools Used** : HTML, CSS, JavaScript
- Make Your Resume is a JavaScript-based project designed to simplify resume creation. It features an intuitive form for users to input details like personal information, education, skills, and work experience. The application dynamically generates a professionally formatted resume, offering a real-time preview and an option to download it as a PDF. This project demonstrates proficiency in form handling, dynamic content generation, and PDF creation using JavaScript.

Certifications

- Introduction to front-End Development, Coursera
- CSS - Basics to Adv for front end development, Udemy
- CSS(Basic), HackerRank
