## Summary

---

Enthusiastic web developer with hands-on experience in building responsive and interactive e-Commerce websites, portfolio projects, and internship tasks. Skilled in HTML, CSS, JavaScript, and Python, with a focus on providing user-friendly interfaces and robust solutions.

## Skills

---

- **Programming Languages** : JavaScript, Python
- **Front-End** : HTML, CSS, JavaScript, Bootstrap, React
- **Backend** : Node.js, Express.js
- **Databases** : SQL, MongoDB
- **Version Control** : Git, Github
- **Languages** : English, Tamil

## Education

---

### Bachelor of Engineering in Computer Science and Engineering (Data Science)

2021 - 2025

- Annamalai University, Tamil Nadu
- CGPA: 8.26 (Up to 6th Semester)

## Experience

---

### Front-End Intern *iNeuron*

July 2024 - Aug 2024

- Developed a Front-End of an E-Commerce platform called SMART BUY , which enables user to add items to the cart and proceed to checkout.
- Gained hands-on experience with HTML, CSS, and JavaScript.

## Projects

---

### Personal Portfolio

Nov 2024

- **Tools Used** : HTML, CSS, JavaScript
- This project showcases my personal portfolio website, designed and developed to highlight my skills, experience, and projects. It features a responsive design, smooth navigation, and a visually appealing user interface created using HTML, CSS, and JavaScript. The goal of this project was to create an engaging platform to present myself to potential employers and collaborators.

### Smart Buy

Aug 2024

- **Tools Used** : HTML, CSS, JavaScript
- Smart Buy is a user-friendly e-commerce website built to provide seamless navigation and shopping experiences. It features an intuitive user interface, interactive sections such as a cart page, and well-structured landing pages. Developed using HTML, CSS, JavaScript. This project focuses on creating an efficient platform for presenting products and improving user interaction.

### Make Your Resume

Nov 2024

- **Tools Used** : HTML, CSS, JavaScript
- Make Your Resume is a JavaScript-based project designed to simplify resume creation. It features an intuitive form for users to input details like personal information, education, skills, and work experience. The application dynamically generates a professionally formatted resume, offering a real-time preview and the option to download it as a PDF. This project demonstrates proficiency in form handling, dynamic content generation, and PDF creation using JavaScript.

### Employee Info

Jan 2025

- **Tools Used:** HTML, CSS, JavaScript, MongoDB, Node.js, Express.js
- The Employee Management System is a full-stack application designed to manage employee records efficiently. Allows CRUD operations for employee data, including adding, viewing, editing, and deleting employee details. The back-end, built with Node.js and Express.js, connects to a MongoDB database, while the front-end dynamically renders data using JavaScript. This project showcases skills in API integration, database management, and front-end back-end interaction.

## Certifications

---

- Introduction to front-End Development, Coursera
- CSS - Basics to Adv for front end development, Udemy
- CSS(Basic), HackerRank

## Leadership and Responsibilities

---

**Executive Member**, IEI Student Chapter

*2024 - Present*
